1	THE JANITZA LICENSE MODEL	2	
---	---------------------------	---	--

These instructions explain the license model of the GridVis software and how to manage the licenses via the license server.

Content

- General license model
- Activating a license upgrade
- Activating a license extension
- Sending and downloading activation files
- Requesting the deletion of an activated installation

1 The Janitza license model

When you purchase a GridVis edition (Professional, Service or Ultimate), you receive a license to activate your GridVis installations. Depending on the edition, you can activate a different number of installations.

GridVis-Komponente	Professional	Service	Ultimate
Desktop	3	5	5
Dienst	0	2	2

After activating a license on the license server, you have one year to install newer versions of the licensed component for free (update period). You can, for example, switch from 7.3 to 7.4 if the latter is released during your active update period. Smaller version updates from 7.3.XX to 7.3.XX+X are also possible after the update period has expired. You can continue to use the already activated version free of charge after the update period has expired.

To activate a version that was released after the update period has expired, you can purchase an extension of the update period. An extension is always valid for one year from the last day of validity of the last update period.

You can purchase a license upgrade at any time and thus extend your license to the next higher GridVis edition.

Lizenz 12970 Edition SERVICE					Upd	late Zeitraum	endete am 18	. August 2016		
	Lizenz Upgrade	Lizenz Verlängerung	Neue Installati	on hinzufüger	ı					
	Installierbare Versionen:		● 7.4.x	🖲 7.3.x	07	7.2.x	⊖ 7.1.x	⊖ 7.0.x	⊖ 6.0.x	
	Bislang keine Installationen.									

Fig. 1: License with expired update period

Example for the update period:

You would like to activate a GridVis 7.3 installation in September 2018 with the GridVis service license 12970 from figure 1.

The update period of this license expired on August 18, 2016. You can continue using installations up to version 7.1 with this license. As of version 7.2, which was released after the update period expired, the update period must be extended.

You need 3 update periods to cover September 2018:

- 1. Period until August 18, 2017
- 2. Period until August 18, 2018

• 3. Period until August 18, 2019

You can login to the Janitza license server with a Janitza customer account. Here, you have an overview of your licenses and can manage them.

On the license server, you can:

- Activate GridVis installations,
- Upgrade licenses (to the next higher edition),
- Extend update periods,
- Download or send activation files again.
- Request the deletion of an activated GridVis installation.

You can reach the license server at license.janitza.de.

- i It may be necessary to delete an activated GridVis installation in the following situations:
- i
- You have installed a new GridVis version (for example from 7.3 to 7.4).

i

i

• You have updated an operating system.

Extension and upgrade

To extend an activated license or upgrade to the next higher edition, you will need a serial number that you received with the purchase.

Update period

After activating your license, you have one year to activate current versions of the licensed component.

You can purchase extensions for this period for one year at a time.

Such an extension is always valid from the last day of the last valid update period.

Licenses

You can purchase licenses for the GridVis editions Professional, Service and Ultimate.

Depending on the edition, you can activate a different number of installations. Deletion

page 10 of 11

For an activated installation that you no longer use you can request a deletion.

You have to enter a reason for this.
