| 4 | SUMMARY | 15 |

These instructions show you how to activate your GridVis license and how to license GridVis installations.

Content:

- Licensing the GridVis Desktop
- Logging onto the license server
- Activating a new edition (license package)

When you purchase a GridVis edition (Professional, Service or Ultimate), you receive a license to activate your GridVis installations. Depending on the edition, you can activate a different number of installations.

After activating a license in the license manager, you have one year to install newer versions of the licensed component for free (update period). You can continue to use the already activated version free of charge after the update period has expired.

To license a new version of the component after the update period has expired, you can purchase an extension of the update period. It is always valid for one year. <u>This extension is valid from the last day of the last valid update period</u>.

Example:

You would like to activate a GridVis 7.3 installation in September 2018 with the GridVis service license 12970 from figure 1.

The update period of this license expired on August 18, 2016. You can continue using installations up to version 7.1 with this license. As of version 7.2, which was released after the update period expired, the update period must be extended.

You need 3 update periods to cover September 2018:

- 1. Period until August 18, 2017
- 2. Period until August 18, 2018
- 3. Period until August 18, 2019

4 Summary

Please enter your text here.

Licenses

You can purchase licenses for the GridVis editions Professional, Service and Ultimate.

Depending on the edition, you can activate a different number of installations.

Update period

After activating your license, you have one year to activate current versions of the licensed component.

You can purchase extensions for this period for one year at a time.

Such an extension is always valid from the last day of the last valid update period.

License server

To activate and manage your licenses, log in to the Janitza License Server with your customer account.

There you have an overview of all your activated licenses, their update period and the number of GridVis installations that have already been activated.

You can find more information about the license server here.

| GridVis-Komponente | Professional | Service | Ultimate |
